

MAPINFO - ADVANCED TRAINING COURSE

MapInfo Professional is a leading Geographical Information System (GIS) that is used by many organisations throughout the UK and Buchanan Computing have developed a range of courses specific to the needs of all their users.

The MapInfo Advanced course is aimed at those who have already attended the MapInfo Standard Training course or have a working knowledge of MapInfo Professional. It should provide users with the confidence to use MapInfo's functionality to maintain data tables, and carry out advanced manipulation and analysis of geographic information. The course is accompanied by a comprehensive manual and exercises throughout.
