

MAPINFO - STANDARD TRAINING COURSE

MapInfo Professional is a leading Geographical Information System (GIS) product that is used by many organisations throughout the UK and Buchanan Computing have developed a range of courses specific to the needs of all their users.

The MapInfo Standard course is aimed at those who are new to, or have limited knowledge of MapInfo Professional. It should provide users with the confidence to use MapInfo's functionality to view, manipulate, and analyse information geographically. The course is accompanied by a comprehensive manual and exercises throughout.
